

What is RP1Cloud?

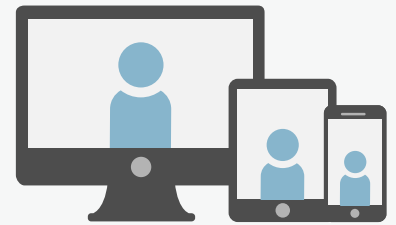

RP1Cloud is an affordable cloud video conferencing solution for all businesses, from SMB to Enterprise!
And it's as straightforward as it gets. You can be on a call in 4 clicks. 15 seconds. That's it.

Use RP1Cloud to host any type of conference.

It's an all-in-one conferencing platform. Use it to host audio calls, video calls or to collaborate in web conferences. And all for the price of a single license, with no limit to the number of minutes used.

Access it from anywhere.

That's the beauty of the cloud – everyone connects via whatever device they have, be it browser, phone, conferencing endpoint and so on.

Share and share alike!

Once connected, share your work! Collaborate on documents or even whiteboard ideas! No need to go through the hassle of meeting in person. Not anymore.

It's got BIG (Virtual Meeting) Rooms.

Need to put a lot of people on a call? You needn't worry. RP1Cloud VMRs hold up to 50 people for a video conference call. That's a lot of talking heads.

Use it to natively schedule.

Schedule, invite and manage pending meetings in-app. Have RP1Cloud automatically send email invites and updates to everyone on your list.

Record. Access those recordings.

Did someone miss your meeting? Want a recap on an important conversation? Record your call and access it directly in the platform. No need to track it down from IT anymore. It'll just be there waiting for you.
